CAREER OBJECTIVE

Dynamic and driven cybersecurity enthusiast with foundational expertise in cybersecurity and network security. Eager to secure digital landscapes while evolving in a fast-paced security environment.

EDUCATION

Prasad V. Potluri Siddhartha Institute of Technology

Bachelor of Technology in Computer Science — CGPA - 9.04

Kanuru, Vijayawada

Jun. 2022 – May 2026

PROJECTS

Malware Detector using Python and YARA Rules | *Python, YARA, MalwareBazaar*

May 2026

- Developed an automated detection engine using Python and the yara-python wrapper to scan and triage active binary samples against custom signature sets.
- Authored heuristic YARA rules targeting specific malware threat behaviors, including string obfuscation, malicious import tables, and persistent execution mechanisms.

Linux System Resource Manager | *C++, Linux, POSIX APIs*

Feb 2026

- Developed a high-performance CLI tool to visualize real-time CPU, memory, and process telemetry by parsing the Linux /proc pseudo-filesystem.
- Implemented efficient File I/O in C++ to monitor system utilization metrics and flag anomalous process behaviors while minimizing execution overhead.

Web Application Firewall | *SafeLine, Kali Linux, Docker*

Nov 2025

- Engineered a reverse proxy solution using SafeLine WAF to protect web applications from OWASP Top 10 vulnerabilities like SQLi and XSS.
- Implemented Layer 7 defense mechanisms, including rate limiting and custom firewall rules, and configured SSL/TLS encryption via OpenSSL.

VIRTUAL INTERNSHIPS

Cyber Security Job Simulation By Forage | *Mastercard*

- Learned about Cyber attacks, created presentations educating on phishing attacks and simulated results of the phishing.

Zero Trust Cloud Security Virtual Internship | *Zscaler*

- Studied Zero Trust security principles and their cloud implementation and learned methods to mitigate Cyber threats using Zero Trust architecture.

CERTIFICATES

- **Cybersecurity Professional Certificate** By *Google*
- **Azure Fundamentals - AZ900** By *Microsoft*
- **CCNA Certifications** By *Cisco Netacad*
 1. Introduction to Networks
 2. Switching, Routing, and Wireless Essentials
 3. Enterprise Networking, Security, and Automation
- **Introduction to Network Analysis** By *Security Blue Team*
- **Linux Fundamentals** By *HackTheBox*
- **The Cybersecurity Threat Landscape** By *Microsoft-Linkedin Learning*

SKILLSET

Languages: Python, Linux (CLI), SQL, C++

Frameworks and tools: NIST, Zero Security Framework, Wireshark, Nmap

Domain Skills: Computer Networks, Threat and Vulnerability assessment, Incident Analysis, Malware analysis

ACHIEVEMENTS

- **Hands-on Labs:** Gained practical experience through hands-on labs on TryHackMe, HackTheBox, and LetsDefend.
- **College Ideathon:** Secured **2nd prize** for developing **Farm Connect**, an application connecting farmers and the consumers directly.
- **Quiz Week:** Organized and conducted a 6-day college quiz event as part of Student Council during Quiz Week 2025.
- **Notion Club:** Conducted multiple student-led events as a member of the **Lead Council** in the college's Notion Club.
