CAREER OBJECTIVE

Dynamic and driven cybersecurity enthusiast with foundational expertise in cybersecurity and network security. Eager to secure digital landscapes while evolving in a fast-paced security environment.

EDUCATION

Prasad V. Potluri Siddhartha Institute of Technology

Bachelor of Technology in Computer Science — CGPA - 8.99

Kanuru, Vijayawada

Jun. 2022 – Current

PROJECTS

Web Application Firewall | *SafeLine, Kali Linux, Docker*

Nov 2025

- Engineered a reverse proxy solution using SafeLine WAF to protect web applications from OWASP Top 10 vulnerabilities like SQLi and XSS.
- Implemented Layer 7 defense mechanisms, including rate limiting and custom firewall rules, and configured SSL/TLS encryption via OpenSSL.

Phishing Attack Simulator | *GoPhish, Railway*

May 2025

- Simulated real-world phishing attacks using Gophish to evaluate user behavior and identify potential vulnerabilities.
- Analyzed campaign results to provide actionable insights on user susceptibility and enhance security awareness training efforts.

Insider Threat Detection | *Deep Learning, Python*

Oct 2025

- Developed a deep learning model to identify anomalous user behavior indicative of potential insider threats in an organization.
- Analyzed user activity patterns to detect deviations from normal behavior, providing insights for proactive threat mitigation.

VIRTUAL INTERNSHIPS

Cyber Security Job Simulation By Forage | *Mastercard*

- Learned about Cyber attacks, created presentations educating on phishing attacks and simulated results of the phishing.

Zero Trust Cloud Security Virtual Internship | *Zscaler*

- Studied Zero Trust security principles and their cloud implementation and learned methods to mitigate Cyber threats using Zero Trust architecture.

CERTIFICATES

- Cybersecurity Professional Certificate** By *Google*
- Azure Fundamentals - AZ900** By *Microsoft*
- CCNA Certifications** By *Cisco Netacad*
 - Introduction to Networks
 - Switching, Routing, and Wireless Essentials
 - Enterprise Networking, Security, and Automation
- Introduction to Network Analysis** By *Security Blue Team*
- Linux Fundamentals** By *HackTheBox*
- The Cybersecurity Threat Landscape** By *Microsoft-Linkedin Learning*

SKILLSET

Languages: Python, Linux (CLI), SQL, C++

Frameworks and tools: NIST, Zero Security Framework, Wireshark, Nmap

Domain Skills: Computer Networks, Threat and Vulnerability assessment, Incident Analysis, Malware analysis

ACHIEVEMENTS

- Hands-on Labs:** Gained practical experience through hands-on labs on TryHackMe, HackTheBox, and LetsDefend.
- College Ideathon:** Secured **2nd prize** for developing **Farm Connect**, an application connecting farmers and the consumers directly.
- Quiz Week:** Organized and conducted a 6-day college quiz event as part of Student Council during Quiz Week 2025.
- Notion Club:** Conducted multiple student-led events as a member of the **Lead Council** in the college's Notion Club.
